The European Money Markets Institute (EMMI), as a critical benchmark administrator, adopted a Conflicts of Interest Policy and Conflicts of Interest Procedure in order to identify, prevent and manage any actual or potential conflicts of interest and to protect the integrity of the process for the determination, calculation and publication of the Efterm benchmark.

EMMI understands 'conflict of interest' to be defined as follows:

An actual conflict of interest refers to a situation where the impartiality and objectivity of a decision, opinion or recommendation of a body or a person is compromised by a personal or business¹ interest held by or entrusted to a given individual.

A perceived conflict of interest refers to a situation where the impartiality and objectivity of a decision, opinion or recommendation of a body or a person might be perceived as being compromised by a personal or business interest held by or entrusted to a given individual, even if in fact there is no such undue influence.

A conflict of interest situation may arise in particular as a result of a business activity, an economic interest, company ties, or any other relevant connection or shared interest.

¹ EMMI Mapping of Conflicts of Interest (D0330H-2018) provides the following definitions of personal or business interest:

- 1) Personal interest is a situation in which a person has a financial interest or a personal connection that could impair that person's ability to act impartially and in the best interest of EMMI. Financial interest is anything of monetary value that might have an impact on a person's own financial situation. Personal connection is a formal or informal family tie, close friendship or a relationship with a person with whom there has been a personal conflict in the past.
- 2) Business interest is a situation whereby a person has a business contact or an affiliation to an organisation or an entity that could impair that person's ability to act impartially and in the best interest of EMMI.
